Exotic Custom Pools

Available Pool Services:

Here at Exotic Custom Pools, we like to offer our clients full-service support through out the year. From initial opening at the beginning of the season, weekly cleaning and maintenance during the season, and closing and winterizing the pool to protect your backyard paradise through the cold winter months. Our team will ensure you get the most out of your pool.

Pool Opening:

Standard Pool: $400
Standard Pool and Spa: $475
Negative Edge, Water Trough: starting at $65
Stand Alone Spa: $200
Additional Water Features may be Billed accordingly:

During the opening, our service team will flush and clean all systems (up to 4 gallons of chlorine will be provided). All equipment will be inspected to ensure they are properly functioning. Once water level is brought to the proper level, the pool will be cleaned. Following this, our technicians will balance all pool chemicals.

Note: It is the customer's responsibility to furnish all needed water. All chemicals required will be billed accordingly.

Weekly Maintenance:

Standard Pool: $80 / week
Pool and Attached Spa: $95 / week
Negative Edge, Water Trough: starting at $20
Stand Alone Spa: $70 / week
Additional Water Features may be Billed accordingly:

Our service team will clean your pool, check to ensure your equipment is working properly, and ensure proper chemical balance.

Note: All chemicals required will be billed accordingly.

Pool Closing/ Winterizing:

Standard Pool: $450
Standard Pool and Spa: $550
Negative Edge, Water Trough: starting at $65
Stand Alone Spa: $250
Additional Water Features may be Billed accordingly:

At the end of the season, our service team will properly shut down all equipment. The pool lines will be winterized and sealed to protect the in-ground plumbing from freeze. All debris will be netted and removed before the pool is properly covered with pool coverings.

Note: Any issues found with the equipment will be reported and discussed with the customer at the time of finding.

Pool Opening:

At the beginning of the season, our trained technicians will properly initiate all pool equipment, ensure the pool is clean, and balance all chemical levels for our clients' enjoyment.

- Remove the safety cover or protective tarp.
- Clean the pool surface and floor from any debris that has built up.
- All pool plugs are removed, and the antifreeze is flushed out of the pool lines.
- The water level of the pool is filled up to the proper height.
- All Electrical systems are turned on in the proper sequence and checked for proper functionality.
- The pool heater gas lines are turned on to start heating the pool.
- Once the pool and equipment is functional, all chemicals will be balanced.

Note:

- All required water will be furnished by the owner.
- All chemicals required to properly open the pool will be invoiced accordingly.
- Any maintenance or up-keep needed for all equipment will be discussed with the homeowner at their convenience.

Weekly Maintenance:

During the summer season, our team will provide weekly services and conduct the following steps to clean and maintain your pool and equipment.

- We start by skimming the water's surface to remove any debris.
- As needed, we scrub all the walls, steps, corners where dirt and debris can build up.
- Following this we vacuum the pool floor to ensure the pool is fully cleaned.
- We ensure all baskets are emptied to allow proper water flow.
- We will run a backwash through the Sand Filter to clean out the system, or rinse out any filtration system.
- Next, we check all automated system to make sure they are running properly.
- Ensure system is working properly; we check that the pump is fully primed with water and make sure the return pressure to the pool is good.
- Following the system maintenance, our technician will check all the pool chemical levels.
- All chemicals will be provided on-site and will be invoiced accordingly.

Note:
These weekly checks will keep the pool running efficiently and will allow our team to address any issues as found. We take pride in taking care of our customers.

Pool Closing/ Winterizing:

At the end of the season, our technicians will properly seal up your pool and close it down to protect it from the cold winter months and protect the equipment and plumbing from Michigan's freeze cycles.

- Drain the water level below the returns.
- All pool lines are drained, blown out, and flushed with antifreeze.
- Pool returns and drains are plugged with Winter Rubber Expansion Plugs to ensure the system is water-tight.
- All Equipment is drained, to ensure water left in the system does not damage the equipment during freeze cycles.
- All debris is cleaned off the pool surface and floor.
- The pool is then covered with a safety cover, or a standard tarp pool cover secured with bricks
- Electrical Breakers are turned off to the pool equipment including automated systems.
- Gas is shutoff for the pool heater during the winter months.

Note:
It is the customer's responsibility to provide all proper manufacturing lids, gaskets, plugs, etc. If they are not available, Exotic Custom Pools will help procure them and bill accordingly.
